

DREDGING REPORT 2021-2022

- Dredging was done! All activities that Toot was involved in this past year is in the Log Book on Toot. It will give dates for installing markers for race & channel as well as each date for dredging and surveys!
- The one mechanical issue is that the oil cooler on starboard engine needs replacing. The anti freeze is leaking as a result. Melton Brothers are aware of this and will replace.
- I discussed with Walter that the exterior of Toots cabin needs sand blasting, repair and painting, especially the roof as we have some leaking! Melton Brothers are ok with a blasting company to come on their site!
- Other than the above, all is good!
