

Dock board update April 2025

Melton quote

Frank registered concern over 4x4 with Walt. He may rejigger to look at 2x6.

I spoke with Walt and he thinks 2x6 will be too expensive. Walt and Louis will do 2 different options on their docks this summer so members can look at the options and then decide.

Melton said \$120/hr to weld. Plus materials. They won't look at it this spring. They are getting busy now. Would be a good winter project for them they say. Tom said 1 hr per dock for the work but this may be an underestimate.

(This cost is more than the cost quoted by Walt and Louis Resendes

Frank Foote checked code for dock electrical:

Twist locks required.

GFI not required.

Walt concerned about water outlets above the electrical in some places.
