Sat, Jun 22, 2024 at 10:37 AM

Hi Trish

Please see below my reports for the meeting...they are brief!

2023

We had a successful Launch on April 29 and all boats got into the water and their assigned docks. 2 cranes again and I believe we where done by Noon!

October 21st haulout went smoothly (Thank you Pat Manchurek and ground crew as Ally and I where away at 10 AM that day on our 14,000 km road trip!)

2024

April 27th launch went well this year and Thank you to the ground crew again who made the job easier. Dock distribution this year was a challenge due to the amount of larger boats that have come to the club in recent years. As of this writing we are full with all docks occupied...a good problem to have. At the present time we have 2 people on a wait list for docks. Haul out has been scheduled for Oct 26th this year and 2 cranes are again booked for this event.

Also, after boats are hauled out we are going to use Moir Cranes equipment to lower the Gyn Pole for maintenance and then in spring of 2025 they will put it back up again.

Respectfully submitted

Mike Lippmann
