Subject: PP39 for Cedar Island Yacht Club

To: J Durocher <jdurocher85@gmail.com>

Jordan,

Good morning.

Yes.....we can add an aluminum hanger on the back of the pedestal.

I talked to our owner, and understanding your situation, he is allowing us to sell direct to you. Typically, we would go through an electrical distributor for the sale but that would increase the cost to you. If you do decide to go through with an order, we would ask for a 50% deposit on order and the remaining 50% upon shipment.

For the pedestal you described, the part number would be **PP39-2-515GFI-1HB-1HR-LC**.

This park style pedestal is 39" tall and would include 2x 15A 120VAC duplex GFI receptacles as requested, each mounted under a lockable in-use cover. There will be indirect lighting under the lid, controlled by a photocell mounted into the side of the pedestal. No load breakers or distribution blocks are included in this configuration. There will be 1x hose bib mounted in the lower portion of the pedestal. On the back of the pedestal, there will be a stainless steel hose rack. The pedestal would be constructed from aluminum and powder coated our standard Equipment Green.

A price for this pedestal is **\$1193.50** each plus taxes FOB Sutton West.

There would be an extra charge for custom colours, depending on the quantity ordered. As well, we could construct the pedestals from 316 stainless steel for an additional **\$250.00** each.

Let me know what you think, and we can go from there. We can change the configuration as you see fit, as well as changing the construction to 316 stainless steel if required.

Thanks,

**Roy Doran**

**Subject:** Re: Sample PP39

Good morning Roy,

I'm also curious if there is an availability to add hanger hooks for the hose when its rolled up to be neatly hung on the ped itself.

Jordan,

Good afternoon.

Since there are 2x 15A 120V circuits, I will price up the PP39 with 2x of the 15A duplex GFI receptacles, each with their own in-use cover.

Also included would be the indirect lighting under the lid and 1x hose spigot.

I will price in both our standard powdercoated green aluminum and in 316 stainless steel.

You will hear from me soon.

Thanks,

**Roy Doran**

Hey Roy,

Each ped currently has 2-15 amp feeds to it.
